-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claim 3 is objected to because of the following informalities: In claim 3, line 3, it appears “to” should be ---so--- for proper grammar. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6, there is no antecedent basis for “said brush shaft lower portion”.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1744

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Quiroz (US patent 6,301,740) .

The patent to Quiroz discloses the invention, an adjustable angle paint brush, as is claimed. Quiroz discloses an extension pole (50), a U joint (26,26') and a paint brush shaft (42,43) with attached bristles (34). The U joint is attached to the extension pole via threads (24) and pivotally receives a brush shaft lower portion (43) therein. Pin (23) retains the brush shaft lower portion in the U of the U joint so the brush can pivot in an arcuate manner. The brush shaft is frictionally fit to the inner walls of the U to that the brush shaft can retain its position after adjustment by a user.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Quiroz (US patent 6,301,740) in view of Graham (US patent 4,524,484).

The patent to Quiroz discloses all of the above recited subject matter with the exception of the extension pole being comprised of a plurality of telescoped tubular members.

Art Unit: 1744

The patent to Graham discloses an adjustable extension pole (fig.1) for tools, for example painting tools. The extension pole includes tubular members (12,14) telescoped together which can be selectively locked together by locking means (19,30) at desired lengths.

It would have been obvious to one of skill in the art to provide an adjustable extension pole for the extension pole of Quiroz, as clearly suggested by Graham, to enable selection of a length for the extension pole that is most effective for the particular job being done.

### ***Conclusion***

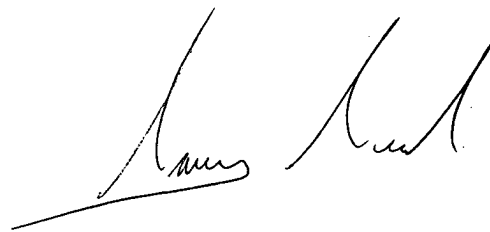

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
